

RISHABH KAUSHIK

Software Developer

Calgary, AB | rishabhkaushik33@gmail.com

PROFESSIONAL SUMMARY

Recent software development graduate (SAIT, August 2026) with hands-on experience building applications on Microsoft Azure. I turn business requirements into working software in an Agile team, work in TypeScript, JavaScript, and Python with SQL databases and REST APIs, use Git, and write clear documentation as I go. What sets me apart is real end-to-end delivery, leading a four-person Agile team, and three years of prior client-facing business experience, plus daily use of Microsoft Copilot and other AI tools. I am eager to grow as a developer on the Microsoft cloud stack, including the Power Platform and SharePoint, learning from experienced consultants and architects.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Vite, Node.js, Express, Tailwind CSS

Databases & Services: Azure SQL, PostgreSQL, Azure Blob Storage, Supabase, Stripe, Resend

Tools & Platforms: Microsoft Azure, Azure Container Apps, Git, GitHub, CI/CD, Jira, Monday.com

AI-Assisted Development: GitHub Copilot, Cursor, Claude, ChatGPT; LLM-driven code generation, debugging, test creation, and documentation

Concepts: Microsoft Azure, REST APIs, relational databases, requirements to software, automated testing and QA, version control (Git), as-built and technical documentation, Microsoft Copilot and AI tools, agile delivery

PROFESSIONAL EXPERIENCE

Full Stack Developer & Project Manager | GBTAC, Calgary, AB

2026

Stack: TypeScript, React, Vite, Node.js, Express, Azure (SQL, Blob Storage, Container Apps), Vitest, Supertest, Playwright, CI/CD

- Led project management for a 4-person Agile team delivering a public web platform for GBTAC researchers, planning and tracking 150+ tasks across four sprints in Jira and owning the team's programming plan and testing strategy.
- Developed both ends of a TypeScript microservices application (8 services plus an API gateway) on Microsoft Azure: a React and Vite front-end and Node.js and Express back-end services, backed by Azure SQL, Blob Storage, and Container Apps.
- Led AI integration for the platform alongside a backend teammate, embedding AI-powered functionality into the researcher-facing experience.
- Built an ingestion pipeline that cleaned, normalized, and loaded the Retrofit Canada case-study dataset into the cloud database, and created interactive visualizations including a choropleth map, EUI comparison charts, and province-level analytics.
- Delivered against performance targets (sub-3-second load, sub-500ms filters) with a three-tier test suite (Vitest, Supertest, Playwright) and CI/CD for build, test, and deploy.

Marketing Manager | Change Your Results Inc., Calgary, AB

2021 to 2024

- Architected and deployed end-to-end marketing automation systems, integrating CRM, email, and scheduling tools to eliminate manual outreach and streamline campaign workflows.
- Designed and launched multi-channel lead intake funnels with conditional logic and automated routing, capturing and qualifying prospects at scale.
- Rebuilt client onboarding workflows to improve time-to-activation, mapping dependencies, removing friction points, and standardizing repeatable processes.
- Managed digital advertising campaigns across Google and social platforms, and partnered with senior leadership to align technical workflows with business growth targets.

EDUCATION

Diploma in Software Development | SAIT, Calgary, AB

May 2025 to August 2026 (Expected)

Relevant coursework: web development, object-oriented programming, database design, software engineering fundamentals, and agile development practices.

PROFESSIONAL DEVELOPMENT

IBM Bob Developer Day | Calgary, AB

July 2026

Hands-on IBM developer event on Bob, IBM's AI coding agent, and building software faster with agentic, AI-assisted development tools.
